

**Request Reference: 3126**

FOI Request dated 04/04/2024

Request –

*1. The number of allegations of drink and needle spiking received by the university at campus bars from the years 2018 - 2023.*

*2. A breakdown of how many allegations per year.*

**Response**

We only hold limited information as generally the person affected does not know who was responsible for the spiking and therefore the University are not usually made aware. We would advise you contacting the HUSU ([Hull University Student Union](#)) directly, as the HUSU is a separate entity to the University therefore their data will differ to that of the University.

We also do not have any information relating to spikings before 21/22.

Academic Year	Spiking Type	Number of Reports
21/22	Drink	1
	Injection	0
22/23	Drink	3
	Injection	1
23/24	Drink	1
	Injection	1
