

**Request Reference: 3166**

FOI Request dated 17/05/2024

Request –

*Could I get the following figures for this academic year:*

*Number of SpLD students at the university*

*and then more specifically*

*Number of Dyslexic Students*

*Number of ADHD Students.*

*Number of British National Students at the university*

**Response**

These figures are provided using the 1<sup>st</sup> December census for 23/24 enrolled students.

There are (rounded to the nearest 5) 1090 students with the category “A specific learning difficulty such as dyslexia, dyspraxia or AD(H)D” recorded against them. This could be in conjunction with other coded disabilities or just that category. We are not able to break the number down into the separate conditions like dyslexia and ADHD as that is the lowest level of the data.

There are 9520 (to the nearest 5) students whose nationality is given as one of the following:  
British National, British National (Overseas), UK, English, Welsh, Scottish.
