UNIVERSITY OF HULL

Student Experience and Success Strategy 2022

Working with your input, we have co-created our Student Experience and Success Strategy. Here's a summary of the strategy to highlight what this means for you.

Vision

To be a university where you, our students, feel that you belong, feel safe and are supported to succeed.

Mission

To ensure you feel part of an inclusive, empowering, progressive, and supportive community, which fosters imagination and creativity. A community where it feels safe to question, challenge, and act, making a difference and benefiting individuals and society, now and for the future.

We will celebrate our success, value our differences, and respect each other.

We will achieve this by...

Providing opportunities

Our inclusive learning and student experience enables you to:

- build skills and experiences to follow the future that you want

- enhance your self-awareness, confidence and creativity

- identify and achieve your individual goals and potential

- develop life skills through volunteering, clubs and societies, and international experiences

- live and learn in an accessible and welcoming environment

Forging partnerships

We will work in partnership with:

- you to enhance your experience

- HUSU to ensure student representation is effective and sustainable

- the local community, employers, regional and global partners, and our Alumni to provide a range of enhancement activities

- schools and colleges to improve access, transition and success at university, giving you and future students the best possible start

Enhancing communication

We will communicate:

- clearly and with purpose

- using appropriate channels which you can access according to your needs

- with our whole community, fostering two-way dialogue

- with you from the very start of your student journey, and beyond, long after graduation

Coordinating support

Our student support is:

- easy to access

- co-ordinated across academic and non-academic areas

- designed to support your well-being and mental health

- personalised to your needs
