

## ICT Acceptable Use Policy (Guidance)

<b>Classification:</b>	Policy
<b>Version Number:</b>	2.0
<b>Status:</b>	Approved
<b>Approved by (Board):</b>	University Leadership Team
<b>Approval Date:</b>	20 July 2021
<b>Effective from:</b>	20 July 2021
<b>Next Review Date:</b>	Biennial
<b>Document Authors:</b>	Steph Jones, Stewart Doyle
<b>Document Owner:</b>	Security and Architecture Manager, ICT (Steph Jones)
<b>Department/Contact:</b>	support.hull.ac.uk
<b>Summary:</b>	This document expands on the principles set out in the ICT Acceptable Use Policy, and is intended to provide guidance for anyone using ICT provisioned systems and services to ensure accordance with it.
<b>Scope:</b>	All University members and third-parties using University owned or provisioned systems and services.
<b>Collaborative provision:</b>	Not applicable
<b>Assessment: (where relevant)</b>	Not applicable
<b>Consultation: (where relevant)</b>	Not applicable
<b>Relevant legal frameworks:</b>	See relevant section of overarching Information Governance and Assurance Policy
<b>Related documents:</b>	To be read in conjunction with the ICT Acceptable Use Policy
<b>Published locations:</b>	Public website ( <a href="http://www.hull.ac.uk">www.hull.ac.uk</a> )
<b>Document Communication and Implementation Plan:</b>	Available upon request.

All printed versions of this document are classified as uncontrolled.  
A controlled version is available from the university website.

# ICT Acceptable Use Policy (Guidance)

## 1. Introduction

- 1.1 This document expands on the principles set out in the [ICT Acceptable Use Policy](#). It provides many examples of the details the specific situations and is intended to help you relate your everyday use of the ICT systems and services to ensure accordance with it.
- 1.2 Where a list of examples is given, these are just some of the most common instances, and the list is not intended to be exhaustive.
- 1.3 Where the terms similar to *Authority*, *Authorised*, *Approved*, or *Approval* appear, they refer to authority or approval originating from the person or body identified in section 3, Authority, or anyone with authority delegated to them by that person or body. The term 'Approval from the University' is used where procedures and policies require approval or authorisation outside of the ICT Acceptable Use Policy or this guidance.

## 2. Scope

- 2.1. The ICT Acceptable Use Policy applies to all University members and third-parties, also referred to as 'users'. In addition to University staff and students it could include, for example:
  - Visitors to the University website, and people accessing the University's online services from off campus;
  - Members of Council and associated committees, honorary staff, visiting academics and other associate members of the University, including alumni;
  - External partners, contractor and agents based onsite and using the University's network, or offsite and accessing the University's systems;
  - University tenants using the University's desktop, servers or network;
  - Visitors using the University's guest wireless service;
  - Students and staff from other institutions logging on using Eduroam.
- 2.2. Systems and services include, for example:
  - ICT hardware that the University provides, such as desktop workstations, laptops, tablets, smart phones and printers;
  - Software that the University provides, such as operating systems, office application software, mobile apps, web browsers etc. It also includes software that the institution has arranged for you to have access to, for example, special deals for students on commercial application packages;
  - Services that the University provides, such as social media, web applications, email and other services relating to domain names owned by the University;
  - Data that the University provides, or arranges access to. This might include online journals, data sets or citation databases;

- Access to the network provided or arranged by the University. This would cover, for example, connectivity to the internet from University PCs, on campus wireless and network connections in University managed student residences;
- Online services arranged by the University, such as online information resources, Box or Office 365;
- ICT credentials, such as the use of your University user ID and password, or any other token (email address, smartcard, dongle) issued by the University to identify yourself when using ICT systems or services. For example, you may be able to use drop in facilities or wireless connectivity at other institutions using your usual user ID and password through Eduroam. While doing so, you are subject to University regulations, as well as the regulations at the institution you are visiting.

### 3. Compliance

3.1. It is important to remember that using ICT has consequences in the physical world. Your use of ICT is governed by ICT specific laws and regulations, but it is also subject to general laws and other University policies, regulations, and procedures. It is expected that your conduct is lawful. In the UK ignorance of the law is not a defence for unlawful conduct.

3.2. Your behaviour is subject to the domestic laws of the land, even those that are not apparently related to ICT such as the laws on fraud, theft and harassment. There are many items of legislation that are particularly relevant to the use of ICT, including:

- **Obscene Publications Act 1959 and 1964;**
- **Protection of Children Act 1978;**
- **Police and Criminal Evidence Act 1984;**
- **Copyright, Designs and Patents Act 1988;**
- **Computer Misuse Act 1990;**
- **Defamation Act 1996 and 2013;**
- **Data Protection Act 1998 and 2018 (General Data Protection Regulation (GDPR));**
- **Human Rights Act 1998;**
- **Regulation of Investigatory Powers Act 2000;**
- **Freedom of Information Act 2000;**
- **Freedom of Information (Scotland) Act 2002;**
- **Privacy and Electronic Communications (EC Directive) Regulations 2003;**
- **Prevention of Terrorism Act 2005;**
- **Terrorism Act 2006;**
- **Police and Justice Act 2006;**
- **Criminal Justice and Immigration Act 2008;**
- **Equality Act 2010;**
- **Counter-Terrorism and Security Act 2015.**

For example, you may not:

- Create or transmit, or cause the transmission, of any offensive, obscene or indecent images, data or other material, or any data capable of being resolved into obscene or indecent images or material;
- Create or transmit material with the intent to cause annoyance, inconvenience or needless anxiety;
- Create or transmit material with the intent to defraud;
- Create or transmit defamatory material;
- Create or transmit material that is discriminatory on the grounds of race, age, sex, disability, gender reassignment; marriage and civil partnership, pregnancy and maternity, religion or belief; or sexual orientation;
- Create or transmit material likely to incite hatred or terrorism;
- Create or transmit material such that this infringes the copyright of another person or organisation;
- Create or transmit unsolicited bulk or marketing material to users of networked facilities or services, save where that material is embedded within, or is otherwise part of, a service to which the user or their user organisation has chosen to subscribe;
- Deliberately (and without authorisation) access networked facilities or services.

3.3. If are using services that are hosted in a different part of the world, you may also be subject to foreign law. It can be difficult to know where any particular service is hosted from, and what the applicable laws are in that locality. In general, if you apply common sense, obey domestic laws and the regulations of the service you are using, you are unlikely to go astray.

3.4. You should already be familiar with the University of Hull general regulations and policies, available at [www.hull.ac.uk/policies](http://www.hull.ac.uk/policies).

3.5. If you use ICT systems and services to access a third party service or resources you are bound by the policies associated with that service or resource (the association can be through something as simple as using your University user ID and password). Very often, these policies will be presented to you the first time you use the service, but in some cases the service is so pervasive that you will not even know that you are using it. Examples of this include:

- When connecting to any site outside the University, will be using Janet, and therefore subject to the Janet Acceptable Use Policy,<sup>1</sup> the Janet Security Policy,<sup>2</sup> and the Janet Eligibility Policy.<sup>3</sup> The requirements of these policies have been incorporated into the acceptable use policy, so if you abide by these then you should not infringe Janet policies;

<sup>2</sup> <https://community.ja.net/library/janet-policies/security-policy>

<sup>3</sup> <https://community.ja.net/library/janet-policies/eligibility-policy>

- When procuring digital content for University use, these are subject to the terms of Jisc Collections.<sup>4</sup>
- Chest is an organisation that has negotiated many deals for software and online resources on behalf of the UK higher education community, under the common banner of Chest agreements.<sup>5</sup> These agreements have certain restrictions such as non-academic use is not permitted.
- Use of any Office 365 services provided by Microsoft.<sup>6</sup>

3.6. There will be other instances where the University has provided you with a piece of software, service, or a resource. These are bound by licence agreements which vary from supplier to supplier. You must only use software, services, and other resources in accordance with all applicable licences, terms and conditions.

## 4. Authority

4.1. The acceptable use policies are issued under the authority of the University Leadership Team. The Director of ICT is responsible for their interpretation and enforcement, and may also delegate such authority to other people.

4.2. Authority to use the University's ICT systems and services are granted by a variety of means:

- The issue of a user ID and password or other ICT credentials;
- The explicit granting of access rights to a specific system or resource;
- The provision of a facility in an obviously open access setting, such as an institutional website; a self-service kiosk in a public area; or a guest wireless network on the campus.

4.3. If you have any doubt whether or not you have the authority to use an ICT system or service, you should seek further advice from ICT.

4.4. Attempting to use or access ICT system or services which the University has not authorised you to use or access may be an offence under the **Computer Misuse Act**.

4.5. You must not use ICT services and systems without due authority. This is usually granted through the issuance of a user ID and password or other ICT credentials.

4.6. You must comply with any reasonable written or verbal instructions issued by people with delegated authority in support of these policies. If you feel that any such instructions are unreasonable or are not in support of these policies, you may appeal to the Director of ICT or through the University complaints procedures.

## 5. Intended use

5.1. The use of ICT systems and services are provided for use in furtherance of University's mission. Such use might be for learning, teaching, research, knowledge transfer, public outreach, the

<sup>5</sup> <https://www.chest.ac.uk/agreements>

<sup>6</sup> <https://www.microsoft.com/en-gb/servicesagreement/>

commercial activities of the University, or the administration necessary to support all of the above.

- 5.2. You may currently use ICT systems and services for personal use provided that it does not breach the acceptable use policies, and that it does not prevent or interfere with other people using the facilities for valid purposes. It should be noted that:
- Personal use of ICT systems and services is a concession and can be withdrawn at any time.
  - Employees using ICT systems and services for non-work purposes during working hours are subject to the same management policies as for any other type of non-work activity.
  - Use of your University email account for personal use is discouraged, including using your University email address when registering for websites that are not related to work. This increases the risk to the University from 'phishing' emails including those containing malware. Additionally, as the University may need to authorise access to your email by other colleagues to ensure business continuity, using a non-University email account for personal correspondence and activities will minimise any privacy risks.
- 5.3. Use of ICT systems and services for non-University commercial purposes, or for personal gain or interest, such as private consulting, running a private club or society, requires explicit approval. The provider of the service may require a fee or a share of the income for this type of use. For more information, please consult ICT in the first instance. Even with such approval, the use of licences under the Chest agreements for anything other than teaching, studying or research, administration or management purposes is prohibited, and you must ensure that licences allowing commercial use are in place.

## **6. Identity**

- 6.1. Many ICT services provided or arranged by the University require you to identify yourself so that the service knows that you are entitled to use it. This is most commonly done by providing you with a user ID and password, but other forms of ICT credentials may be used, such as an email address, a smart card or some other form of security device. When doing so:
- You must take all reasonable precautions to protect this identity, and safeguard any ICT credentials issued to you.
  - You must change passwords when first issued and at regular intervals as instructed. Do not use obvious passwords, and do not record them where there is any likelihood of someone else finding them. Do not use the same password as you do for personal (i.e. non-University) accounts. Do not share passwords with anyone else, even ICT staff, no matter how convenient and harmless it may seem.
  - If you think someone else has found out what your password is, change it immediately and report the matter to ICT.

- Do not use your user ID and password to log in to websites or services you do not recognise, and do not log in to websites that are not secured.
  - Do not leave logged in computers unattended, and log out properly when you are finished.
  - Do not allow anyone else to use your smartcard or other security hardware. Take care not to lose them, and if you do, report the matter to ICT immediately.
- 6.2. Never use someone else's ICT credentials, or attempt to disguise or hide your real identity when using the University's ICT systems or services. However, it is acceptable not to reveal your identity if the system or service clearly allows anonymous use (such as a public facing website).
- 6.3. You must not attempt to usurp, borrow, corrupt or destroy someone else's ICT credentials, or otherwise compromise their identity.

## **7. Infrastructure**

- 7.1. The ICT infrastructure is all the underlying hardware and software that constitutes the ICT function. It includes but is not limited to, desktop workstations, laptops, tablets, servers, mobile phones, wireless devices, specialised equipment, data, network access, user accounts, on-premise and cloud-hosted services.
- 7.2. You must not do anything to jeopardise the University ICT infrastructure. This includes attempting to impair the operation of any ICT system or service, whether at the University or belonging to another organisation. Examples of this include:
- Damaging, or doing anything to risk physically damaging the infrastructure, such as being careless with food or drink at a workstation. Use of University ICT equipment off campus, including limited personal use, must be approved by your department, faculty, or service area and comply with Insurance Office guidance ([www.hull.ac.uk/insurance](http://www.hull.ac.uk/insurance));
  - Attempting to reconfigure the setup of the infrastructure without authorisation, such as changing the network point that a device is plugged in to, connecting devices to the network (except of course for wireless or wired networks specifically provided for this purpose) or altering the configuration of University 'managed' devices. Unless you have been authorised, you must not add software to or remove software from University devices;
  - Moving equipment without authority;
  - You must not extend the wired or wireless network, or disrupt the configuration without authorisation. Such activities, which may involve the use of routers, repeaters, hubs or wireless access points, can disrupt the network and are likely to be in breach of the Janet Security Policy;
  - You must not set up any hardware or software, such as server, that would provide a service to others over the network without permission. Examples would include games servers, file sharing services, bit-coin mining servers, or websites;

- You must take all reasonable steps to avoid introducing malware to the infrastructure. The term malware covers many things such as viruses, worms, trojans, and spyware, but is basically any software used to disrupt computer operation or subvert security. It is usually spread by visiting websites of a dubious nature, downloading files from untrusted sources, opening email attachments from people you do not know or inserting media that have been created on compromised desktops;
- ICT has taken measures to safeguard the security of its infrastructure, including the provision of anti-malware, firewalls, intrusion detection, spam filters and related. You must not attempt to subvert or circumvent these measures in any way.

## 8. Information

8.1. During the course of work or studies, staff and students (particularly research students) may handle information that comes under the **Data Protection Act** or **General Data Protection Regulations**, or is sensitive or confidential in some other way. For the rest of this section, these will be grouped together as protected information.

Safeguarding the security of protected information is a highly complex issue, with organisational, technical and human aspects. The University policies and guidelines on Data Protection and Information Assurance are available at <http://www.hull.ac.uk/policies>, and if your role is likely to involve handling protected information, you must make yourself familiar with and abide by these policies and guidelines. Considerations include:

- When sending protected information electronically, you must use a method with appropriate security. Email is not inherently secure. Guidance on how to send protected information electronically should be sought from the Data Protection Officer;
- Automatic forwarding from a University to a personal email account is not permitted, as this puts protected information at risk of breach;
- Information must not be stored on removable media (such as USB storage devices, removable hard drives, CDs, DVDs) or mobile devices (laptops, tablet or smart phones) unless it is encrypted, and can be stored and transported securely;
- If you access protected information from off campus, you must make sure you are using an approved connection method that ensures that the information cannot be intercepted between the device you are using and the source of the secure service. You must also be careful to avoid working in public locations where your screen can be seen;
- Use of University equipment off campus, including limited personal use, must be approved by your department, faculty or service area. University 'managed' devices should be used for this purpose. Allowing a family member to use a University owned device that may expose information would constitute a breach;
- When using an approved connection methods, devices that are not managed by the University (personal devices) may be more likely to contain malicious software that

could, for example, gather keyboard input and screen displays. You need to be aware of this risk if considering using such devices to access, transmit or store protected information;

- Do not store protected information in cloud-hosted services that are not provided or sanctioned by the University unless securely encrypted first. You should also consider how access to any information could be granted in your absence, if required for business continuity.

8.2. Almost all published works are protected by copyright. If you are going to use material (images, text, music, software), the onus is on you to ensure that you use it within copyright law. This is a complex area, and further guidance is available at <http://libguides.hull.ac.uk/copyright>. The key point to remember is that the fact that you can see something on the web, download it or otherwise access it does not mean that you can do what you want with it.

8.3. You must not attempt to access, delete, modify or disclose restricted information belonging to other people without their permission, unless it is obvious that they intend others to do this, or you are specifically authorised to do so having obtained approval from the University.

- Where information has been produced in the course of employment or study at the University, and the person who created or manages it is unavailable, authorisation maybe granted to retrieve the information for work purposes. Those acting on such authorisation must take care not to retrieve any private information in the account, nor to compromise the security of the account concerned. Contact the Data Protection Officer for further guidance;
- Private information may only be accessed by someone other than the owner under very specific circumstances governed by University and/or legal processes.

8.4. You must not create, download, store or transmit unlawful material, or material that is indecent, offensive, defamatory, threatening, discriminatory, or extremist. The University reserves the right to block or monitor access to such material.

- The University has procedures to approve and manage valid activities involving such material for valid research purposes where legal and with the appropriate ethical approval. For more information, please refer to the Deputy Secretary via your Faculty ethics officer. Universities UK has also produced guidance on handling sensitive research materials;<sup>7</sup>
- The University has a statutory duty, under the **Counter Terrorism and Security Act**, and termed "Prevent", to aid the process of preventing people being drawn into terrorism;
- There is a limited exemption to this policy covering authorised ICT staff involved in the preservation of evidence for the purposes of investigating breaches of University regulations or the law.

---

<sup>7</sup> <https://www.universitiesuk.ac.uk/policy-and-analysis/reports/Pages/security-sensitive-research-material-UK-universities-guidance.aspx>

8.5. Publishing means the act of making information available to the general public, this includes through websites, social networks and news feeds. Whilst the University generally encourages publication, there are some general guidelines you should adhere to:

- You must not make statements that purport to represent the University without approval. If in any doubt, you must consult the Registrar's office for advice;
- You must not publish information on behalf of third parties using the University's systems and services without approval;
- You must not publish any material that would bring the University into disrepute;
- You must not publish any information which the University is contractually obliged to keep confidential or which would breach any law. Guidance can be sought from the Marketing and Communication Directorate for further advice on publishing information.

## 9. Conduct

9.1. University policies and regulations apply to appropriate conduct in the use of ICT systems and services and extending to online activity including social media. These are available at [www.hull.ac.uk/policies](http://www.hull.ac.uk/policies) and [share.hull.ac.uk](http://share.hull.ac.uk), and include, but are not limited to:

- **Bullying and Harassment Policy;**
- **Disciplinary Policy and Procedure;**
- **Diversity and Inclusion Policy;**
- **Anti-Fraud and Bribery Policy;**
- **Code of Practice on Freedom of Speech;**
- **Library Regulations;**
- **Code of Student Conduct.**

9.2. You must not send unsolicited ('spam') bulk emails or chain emails other than in specific circumstances. Advice on this is available from ICT.

9.3. If you are using shared ICT systems or services for personal or social purposes, you should make them available to others with work to do. Similarly, you should not occupy specialist facilities unnecessarily if someone else needs them.

9.4. When using shared spaces, remember that others have a right work without undue disturbance. Keep noise down (turn phones to silent if you are in a silent study area), do not obstruct passageways and be sensitive to what others around you might find offensive.

9.5. Do not consume excessive bandwidth by uploading or downloading more material (particularly video) than is necessary. Do not waste paper by printing more than is needed, or by printing single sided if double sided would suffice. Do not waste electricity by leaving equipment needlessly switched on.

## 10. Monitoring

10.1. The University monitors and logs the use of its ICT systems and services for the purposes of:

- Detecting, investigating or preventing misuse of the systems and services, or for breaches of University regulations;
  - Monitoring the effective function of the systems and services and the University;
  - Investigation of alleged misconduct;
  - The University will comply with lawful requests for information from law enforcement and government agencies for the purposes of detecting, investigating or preventing crime, and ensuring national security.
- 10.2. You must not attempt to monitor the use of ICT systems and services without explicit approval from the Director of ICT. This includes:
- Monitoring of network traffic;
  - Network and/or device discovery – such as ‘port scanning’;
  - Wireless traffic capture;
  - Installation of key logging or screen grabbing software that may affect users other than yourself;
  - Attempting to access system logs or servers or network equipment.
- 10.3. Where ICT is itself the subject of study or research, special arrangements must have been made with the approval of the Director of ICT by the school or faculty.

## **11. Infringement**

- 11.1. Breaches of these policies will be handled by the University’s disciplinary processes, available at [www.hull.ac.uk/policies](http://www.hull.ac.uk/policies). This could have a bearing on your future studies or employment with the University and beyond. Sanctions may be imposed if the disciplinary process finds that you have indeed breached the policies, for example, imposition of restrictions or removal of your use of ICT systems and services; withdrawal of offending material; or fines and recovery of any costs incurred by the University as a result of the breach.
- 11.2. If the University believes that unlawful activity has taken place, it will refer the matter to the police or other enforcement agency.
- 11.3. If the University believes that a breach of a third party’s regulations has taken place, it may report the matter to that organisation.
- 11.4. If you become aware of an infringement of these policies, you must report the matter to ICT.
