#### INTRODUCTION

The Ongoing Achievement Record (OAR) has been developed to evidence the requirements of the Nursing Midwifery Council (NMC). You must achieve specific NMC Practice Standards which are a mandatory requirement for entry to the Nursing register.

This **Student Held** OAR is held in conjunction with the Practice Assessment Document (PAD), which is a record of your practice learning experiences.

Students on NMC approved pre-registration nursing education programmes, leading to registration on the nurses' part of the register, **must be supported and assessed by an appropriately qualified professional.** 

For you to be assessed and 'signed off' on completion of your placements, mentors are guided by the <u>Standards to Support Learning and Assessment in Practice (NMC 2008)</u>

From <u>September 2007</u> a sign-off mentor, who has met additional criteria (paragraph 2.1.3), must make the final assessment of practice and confirm that the required proficiencies for entry to the register have been achieved (paragraph 3.2.6).

From <u>September 2007</u> students on NMC approved specialist practice programmes leading to a recordable qualification on the nurses' part of the register must be supported and assessed by sign-off mentors who have met additional criteria (paragraph 2.1.3), or practice teachers where this is a requirement by commissioners. The sign-off mentor must make the final assessment of practice and confirm that the required proficiencies for recording a specialist practice qualification have been achieved (paragraph 3.2.6).

#### **YOU MUST:**

- [1] Maintain and keep up to date the content of this ongoing 'Ongoing Achievement Record and skills/medication log'
- [2] Share this document with your mentor at all initial interviews and have it accessible at all times during your placement.
- [3] Use this document to record each final interview with your mentor and record the skills & medications you have achieved within the skills/medications log.
- [4] Submit this document along with the Practice Assessment Document (PAD)
- [5] Meet with your Academic Support Tutor (AST) after each placement to discuss your progress (integration of practice/theory). Your AST must sign this document at your meeting.
- [6] Your 'Sign Off' mentor (Practice 9) will use this document to make an informed decision about your competence to proceed to registration (from a practice perspective).
- [7] It is your responsibility to keep this document safe. If it is lost, it will be your responsibility to collect the information to complete it again. Having an incomplete document at the end of P9 for your 'Sign off' mentor to consider may delay your registration with the NMC.

#### Record of Stage Completion SUMMARY

This is a summary of your achievement of the Practice Standards essential for completing your nursing programme and should be completed at the end of each Stage by you and verified by your AST.

Student Name:	Student ID:
Cohort:

## PLACEMENT 1 Module - Skills for Practice (SFP) STAGE 1 (Year 1)

#### Placement 1 Stage 1 -

#### Specific requirements for completion of Assessment 1 Skills for Practice

You will have initial teaching and demonstration of the skills followed by opportunities to practice them in a supported environment where you can ask questions and seek clarification. The intention is to provide you with an opportunity to demonstrate your newly acquired skills. With reference to the competency framework (below) you will be expected to participate in the designated activities under direct supervision.

The four areas of practice you will be assessed in are:

- 1. Infection prevention and control
- 2. Assessing and recording vital signs
- 3. Moving and handling people
- 4. Medicines management

The practice learning outcomes give very clear guidance as to what this means specifically.

#### **COMPETENCY FRAMEWORK – via simulation**

Academic Level	Competency Statement	Level of Student Performance Expected	Student role	Mentor role
Year 1	The student has been exposed to the experience/activity/ issues within the outcome and can contribute to a discussion led by the mentor.	The student can contribute to the discussion by describing how another would undertake the activity/ deal with the situation and explaining their role in the experience.	Has observed or been oriented to the experience/situation/ issue within the outcome and can contribute to the discussion with the help of the mentor	Facilitates exposure to the experience/situation/issue within the outcome by generating a general discussion around the outcome
	The student can accurately describe how they would undertake the activity/ deal with the situation/ what they know about the issues within a chosen example.	The student can describe how they would undertake the activity /deal with the situation/ what they know about the issues and offers an acceptable account underpinned by a relevant knowledge base.	Can participate in the discussion of the experience/situation/ issue by describing their contribution.	Supports the student in their discussion by offering examples that relate to the outcome and asking the student to comment on how they would act or deal with the situation; the mentor shares their knowledge and experiences with the student during the discussion

Although this assessment is in a simulated setting, it is vital to demonstrate adherence to the same professional standards as expected in any practice setting. You are therefore required to attend the assessment on time and be dressed appropriately for clinical practice. You will be provided with safe storage space in which to leave your personal belongings. On the date of assessment you are required to attend the allocated section of CSSS 15 minutes prior to with your OAR with personal details completed and your student card. On completion of the assessment, the member of staff assessing you will complete your Ongoing Achievement Record accordingly.

Due to a range of factors, some students do occasionally fail these assessments. If this is the case for you, the module leader will wherever possible identify a date for you to retake the assessment before the end of the semester.

#### **PLEASE NOTE:**

The date of your assessment is non-negotiable; failure to attend at the designated time without prior discussion and authorisation from the module leader will result in non-attendance being recorded and this will result in you being awarded a fail. Please note any illness leading to non-attendance must be supported by appropriate medical evidence.

To be awarded a pass for Module 92506, all of the outcomes must be achieved. Module team member will sign relevant boxes to record their assessment of your achievement/non achievement of outcomes.

#### **LEARNING OUTCOMES**

Learning Outcomes		Assessment cord	2 <sup>nd</sup> Attempt Assessment Record		
Assessment 1: Infection Prevention and Control	Achieved	Not achieved	Achieved	Not achieved	
1.1 Practise according to the

<ul> <li>Injections</li> </ul>				
COMMENTS				

# RECORD OF STUDENT'S ACHIEVEMENT (AST to tick) YES NO All Practice Learning outcomes for Semester 1 practice experience have been achieved. Level of professional attitude has been assessed as Satisfactory. Action plan for next placement completed with AST. The assessment records have been completed accurately i.e. signed and dated by an assessor.

#### Statement of Non-Achievement (must be completed by AST)

Date:.....

If student has failed to achieve any of the above, please record below together with the reason(s) why and ensure these are transferred to the plan of action to be taken to the next placement. If they have failed and subsequently passed any element within the semester, this should be recorded here.

#### **Ongoing development:**

#### **ACTION PLAN**

In this you should include aspects of practice that need to be focused upon during the next clinical placement. These should be generic and include learning outcomes not previously attempted or achieved.

To help keep the plan of action clear, it should take the form of SMART goals.

- Specific
- Measurable
- Achievable
- Realistic
- Time Framed

e.g. the student will not be late for any of their shifts during the six week placement.

e.g. the student will demonstrate use of 2 forms of non-verbal communication during interaction with patients by the end of week 3 of the next placement.

As this is the 1<sup>st</sup> professional development action plan you will have devised, you will do this with support from your AST.

In preparation for the tutorial you have booked during the assessment period, you need to have identified an action plan that takes into account the experiences (good and not so good) that you have had during this module.

This action plan will be discussed with your AST and <u>must</u> be discussed with the mentor on the next placement at the initial interview. Your mentor on your next placement is required to sign to acknowledge that she/he has seen this action plan. We, the student and AST have agreed that the following specific goals need to be achieved in my next practice experience:

Signature of Student	
Date	
Signature of AST	
Date	

## PLACEMENT 2 STAGE 1 (Year 1)

Final interview - Summative Placement 2 ,Stage 1 Satisfactory Unsatisfactory Practice always Practice mainly reflects Practice reflects Professional Attitude in a reflects professional professional values & unprofessional values Practice Setting values & attitudes attitudes & attitudes (development plan **Final Interview** must be agreed and recorded) Mentor to sign their full signature in the box corresponding to their assessment of the student's professional 1. Make the care of people their first concern, treating them as individuals and respecting their dignity The following activities reflect this principle of care and my assessment of the student's professional attitudes and values in relation to these is: communication with people (patients, their carers/family and colleagues) including listening. maintaining people's privacy and being respectful and courteous and nonjudgmental using their skills of empathy and is sensitive to the needs of others 2. Work with others to protect and promote the health and wellbeing of those in their care, their families, carers and the wider community The following activities reflect this principle of care and my assessment of the student's professional attitudes and values in relation to these is: maintaining confidentiality maintaining records using problems solving skills recognising their own limitations and seeking support when unsure of what to maintaining professional boundaries 3. Be open and honest, act with integrity and uphold the reputation of your profession The following activities reflect this principle of care and my assessment of the student's professional attitudes and values in relation to these is: working alongside other members of the health care team taking responsibility for making the most out of their learning opportunities managing feedback about their learning using reflection as a means of identifying their own learning needs and limitations timekeeping is satisfactory and they communicate appropriately is unable to attend placement complying with hygiene, uniform and dress codes. Reference to NMC Code (2015) may assist your decision making about what is regarded as 'satisfactory professional conduct' from a student. NB Any professional behaviour or attitude assessed by your mentor as failing to reflect appropriate professional standards, may be subject to further investigation by the University and/or relevant Trust/Clinical Placement

This interview gives you and your Sign Off mentor an opportunity to reflect on your overall progress during your final placement experience and for a progress assessment to be completed. It should be completed within the last week of the placement by you and your Sign Off mentor.

NB for Mentors - Should there be an expectation that the student is going to fail the placement, an AST, Link Lecturer or PLF/CST MUST be present at this interview.

You and your mentor should review your on-going development plan(s) and evidence in all of the following sections of the Assessment in Practice Document (please circle).

•	Testimonies	Yes / No	Mentor's Initials:
•	Record of attendance/hours verified	Yes / No	Mentor's Initials:
•	Skills Log/Practice Standards & Medications verified, signed and discussed	Yes / No	Mentor's Initials:
	STUDENT Se	elf Evaluation	
	ay wish to consider the following areas: how sciplinary/interagency working, communicat		
•	Strengths of my knowledge & practice abilities		
•	Aspects of my knowledge & practice I need to	develop furthe	r and how I will achieve this

Final Placement 9 - Stage 3

# **End of Programme Self-Declaration of Good Character and Good Health.**

As you are aware at the beginning of the programme you completed a Disclosure and Barring Service check which provided information about your status re Good Character and had an Occupational Health assessment re Good Health. Following this you were required to make a self-declaration upon re-enrolment each year regarding your character and health. These assessments only told us of your status at the time they were completed.

As a registered nurse you will have a responsibility to provide information about any police cautions/convictions, civil convictions, police investigations and health matters to your employer as they and when they occur. As a student you have a similar responsibility to inform your personal academic tutor / cohort lead of any convictions / cautions / police investigations / health matters as they occur.

At the end of the programme the Lead for Pre-Registration Nursing is required to confirm that you are eligible to register having completed the requirements of the programme and provide an indication as to any matters related to Good Character and Good Health that may impact on your ability to register.

You are referred to the relevant NMC site http://www.nmc-uk.org/Students/Good-Health-and-Good-Character-for-students-nurses-and-midwives/Applying-for-entry-to-the-register/ for information on this. If an issue is highlighted then it may need to be investigated, in which case you will be contacted by a member of the lecturing staff. Information or issues relating to good character or good health will be treated in the strictest confidence and kept in your personal file.

You are required to complete the information below during your post P9 placement meeting with your AST. On completion, Your AST will then forward this along with the Statement of Overall Practice Achievement on the previous page to the Programme Lead.

# **TESTIMONIALS**

# **GUIDANCE**

The following pages provide an opportunity for any service user/carer and/or professional/support worker/peer who you have worked with to comment on (for example) your approach in being caring and compassionate, your practice abilities, the knowledge you apply within your practice & your professionalism.

Discussion MUST be undertaken between yourself & mentor or a qualified member of the team in which you are working before requesting that they seek testimony from a service user or carer on your behalf.

As a student you **MUST NOT** approach a patient, carer or relative directly.

Service users and carers should **NOT** sign these pages (for reasons of confidentiality). Mentors should countersign all testimonials given by service users/carers.

Mentors may also write a testimonial on behalf of the service user/carer if they are unable to do so themselves.

All service users/carers have the right to decline being involved in obtaining testimonials. This should always be upheld and respected.

Mentors may wish to use Testimonials to inform the on-going and final assessment of students during the placement.

# Learning Disability Nursing

# ADDITIONAL FIELD EVIDENCE (AFE)

#### **Evidencing your Additional Field Learning Outcomes**

The NMC (2010) has stipulated that nursing students should be 'confident' in caring for patients/service users from fields of nursing other than their own by the end of the programme.

In order to facilitate this requirement you will be taught about other fields of nursing in the University and will be expected to pursue placement opportunities which will enable you to engage in practical aspects of care related to fields of nursing allied to your own.

Please discuss how you might do this with your AST prior to placement and during placement with your Mentor as part of your Preliminary Interview.

Where possible you should reflect upon the alternative field learning opportunities you have observed or undertaken as part of your own field experience or 'complementary' placement experience and should utilise quality research based evidence and/or policy guidelines to underpin your discussion of what has informed this practice. Your evidence should be signed and dated as achieved by your Mentor and AST.

You are expected to achieve & evidence the 'Additional Field' learning outcomes identified on the next few pages by the end of Stage 2 (P6) for Adult, Mental Health, Child & Maternal Health.

The learning outcomes once achieved must be verified by your mentor in clinical practice and by your Academic Support Tutor when you meet.

Learning Disability Field nursing students are required upon registration to have met all the requirements of a general nurse under European Law. This will include meeting the needs of children and young people who have acute or urgent care needs, maternal health needs, people with long term or life limiting conditions, and people with mental health problems.

#### **Maternal Health**

This Field will be evidenced by completing the learning package.

#### **Skills & Medications Log**

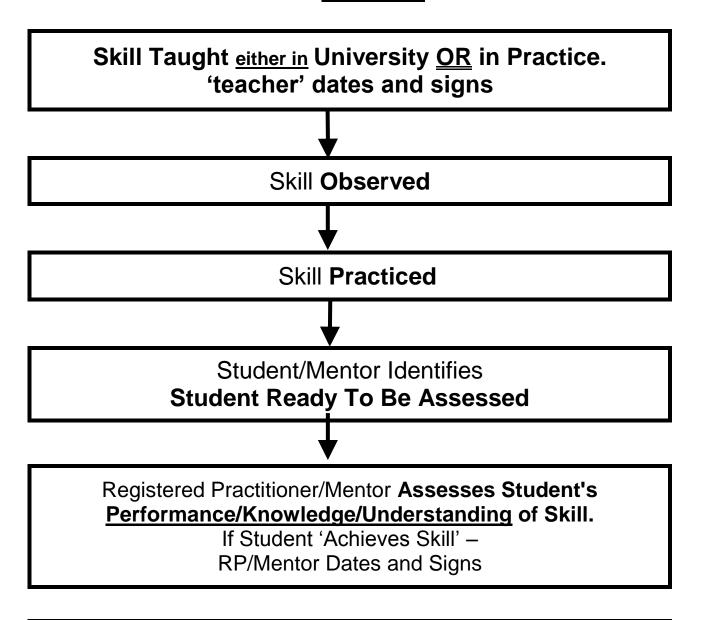

#### Introduction

Attainment of the professional skills outlined in this Skills Log (SL) are essential for the development of your nursing competence and the assessment of your progress in practice. Each skill in this SL has been identified as important by both clinical practitioners and lecturers, and will help you demonstrate that you have achieved the NMC (2010) Standards of Competency for entry to the Register. You should however remember at all times when you have been deemed to have achieved safe performance of a skill you will still always work under the supervision of a First level Nurse/Mentor. **KNOWLEDGE OF COMMON MEDICATIONS HAS BEEN INCLUDED IN THE SL.** 

#### **How to Use This Log book**

- 1. It is a requirement of all nursing programmes that the Essential Skills in this logbook <u>must be met by the end of your programme</u> in order to Register.
- 2. You may <u>observe</u> and <u>practice with guidance</u> the skills in this SL as many times as you wish. Remember repetition and practising of skills with formative feedback is a useful aid to developing competence.
- 3. A Registered Practitioner (RP)/Mentor must sign you have been TAUGHT THE SKILL.
- 4. You should take every opportunity to practice the skill as many times as you feel necessary before you and the RP/Mentor agree you are ready to assess the skill as being achieved.
- 5. RP / Mentors who teach and assess skills must complete the table on page 7.
- 6. 'Skill Achieved' is defined as consistently undertaking a skill in a safe and smooth practice based activity with no need for RP/Mentor intervention. You must also ensure patient/client comfort and should be able to articulate the rationale for the skill.
- 7. You must be proactive in seeking learning opportunities in order to reach the 'skill-achieved' level in each essential skill, working in partnership with practitioners in practice placement areas. The desirable skills [i.e. those in italics] should be attained at the 'skill achieved' level if the opportunity is available. In each category there is a space for additional skills that you have observed, practised and/or achieved.
- 8. REMEMBER you must never work beyond your competence. A RP/Mentor should guide you on your practice placement as to the appropriateness of observing and practicing a clinical skill.
- 9. If you experience difficulty in attaining the 'skill achieved' level in an essential skill you should liaise with your RP/Mentor and where appropriate with your named university lecturer/link lecturer, in order to give you every opportunity to attain ALL essential skills by the end of the specified stage and no later than the end of the programme
- 10. During your placement you must retain this SL and make it available to your RP/Mentors and when required by your programme to your named university lecturer/link lecturer. Successful completion of the Programme can only be ratified when the essential skills (together with the assessment in practice documentation) have been successfully attained at the 'skill achieved' level.
- 11. You MUST submit your SL on the dates specified by your university programme. The SL will be retained by the University; you may photocopy sections for you Personal Development Profile PRIOR to submission.
- 12. **REMEMBER**; once a skill has been achieved, the expectation is that you will continue to perform that skill to a competent standard throughout your placements.

#### Flow Chart

All skills must be completed by the end of the programme.

Skills Logbook MUST be submitted as per specific university programme requirements

W. Torkshire and number Ongoing Achievemen	2016/17	Tie-Registration LD Nursing (H	uii)

## **SKILLS**

## In Order to have the following skills signed off as 'skill achieved' you must

Have been taught, observed and practiced the skill whilst ensuring the individual's comfort, safety, dignity and privacy is maintained throughout the procedure, respecting individuality, culture, age and choice.

Perform the skill as a safe and smooth practice based activity with no need for RP/Mentor intervention whilst articulating the rationale for the skill

Demonstrate effective communication skills throughout the performance of the skill Complete all record keeping for the identified skill.

At all times adhere to the relevant local Organisation policies and procedures and NMC Guidelines Once a skill has been achieved, the expectation is that you will continue to perform that skill to a competent standard

Please complete Common Medication Used in Practice in following pages.

If you are in a placement where you do not administer medication, as an exception and with your programme managers agreement, you must identify a range of medications that the service users are taking and discuss with your mentor the action, effect, side effects and contra-indications of these medications as if you were administering them. If your mentor is happy with your answers, they can then be signed off as being achieved.

# **Medication Used in Practice Placement**

A minimum of <u>5 medications in Stage 1 and a minimum of 10 medications in both Stage 2 and 3</u> MUST be identified, ideally from different drug groups. Drugs must NOT be repeated / duplicated - you need to provide evidence of understanding

# Student & Mentor Checklist - Completion of PAD & OAR

## **Guidance for Completion of Practice Assessment Document (PAD)**

## 1. Orientation to Placement

#### Mentor and student will:

- Complete Orientation to Practice Setting (first shift) & complete placement details page in PAD
- Accurately record attendance record/sick leave/authorised/non authorised & total hours accurately by shift – signed by mentor or registered nurse on a shift basis

# 2. Initial Interview (first week of placement)

#### Mentor and student will:

- Review previous experience/placement and Mentor comments in OAR
- Identify and discuss current Learning needs student
- Identify and discuss which practice standards, skills and AFE can be achieved
- Agree and write an initial development plan
- Set date for Intermediate progress review

## 3. Intermediate Interview (mid-point of placement)

#### Mentor and student will:

- Identify and reflect upon student progress using NMC PRACTICE STANDARDS and Assessment marking tool (GRID) to assess the students' progress and achievement
- Review Ongoing Development plan and learning outcomes
- Sign and date all practice standards achieved
