

**Request Ref: 2856**

FOI Request dated **20/04/2023** as follows –

**Defibrillators access**

*Please detail the number of defibrillators the university has on each of its campuses, and where each is located (i.e. building name and location in the building). For each, please specify whether it is accessible 24/7 or not, and whether an access code is required. Please also include details of defibrillators fitted/included in university vehicles, or any other defibrillators the university owns/manages.*

**First aid training**

*Please detail the level of first aid training security staff (in the context of those who respond to calls) receive to provide emergency first aid response (including emergency Mental Health First Aid). Where appropriate please expand on this with what qualifications or training sessions all staff receive for both emergency first aid and emergency Mental Health First Aid. Please include how frequently re-training takes place.*

**Security response triage**

*Where available, please detail;*

- (i) The triage (or equivalent) system university security uses to prioritise calls (i.e. what method is used to determine how severe one call is when compared to another).*
- (ii) In respect to the above, the target response time for each of the ‘categories’ or ‘levels’.*

**Response times**

*Where available, please detail;*

- (i) The number of emergency, life threatening - for cardiac arrest and heart attack - calls the security team received in the 2021/22, 2020/21 and 2019/20 academic years, and the current 2022/23 academic year if available. If specific data is not available for cardiac arrest and heart attack related calls, please instead provide data for life threatening calls instead.*
- (ii) The average response time (i.e. in minutes) for the above, in the 2021/22, 2020/21 and 2019/20 academic years, and the current 2022/23 academic year if available.*
- (iii) The average response time (i.e. in minutes) for each of the ‘categories’ or ‘levels’ defined within paragraph 3 above, ‘Security response triage’.*

**Response**

**1. Defibrillators access:**

<b>Building</b>	<b>Location</b>	<b>Access 24/7</b>	<b>Access code required</b>
Allam Medical	Ground Floor	No	No
Sports centre	Ground Floor	No	No
Sports Pavilion	Ground Floor	No	No
Central Print Services	Ground Floor	No	No
Canham Turner	Ground Floor	No	No
Raines house	Ground Floor	No	No
Brynmor Jones Library	Ground Floor	Yes	No
Biomechanics (Sports Science Laboratory)	Ground Floor	No	No
Washburn	Ground Floor	No	No
Westfield Court	Ground Floor	Yes	No
Venn	Ground Floor	Yes	No
Courtyard	Ground Floor	Yes	No

## 2. First aid training

Security staff are trained in First Aid at Work (FAW) on a First Aid industry body (FIAB) Approved course. Other University first aiders either hold the above qualification or an Emergency First Aid at Work (EFAW) (FIAB) approved course dependent on building/areas requirements.

Both of the above courses are on a 3-year renewal for training.

The University of Hull has facilitated training for colleagues who provide mental health first aid, at three levels:

1. Mental health awareness (2hr workshop)
2. Introduction to emotional wellbeing and mental health (Canvas resources and course: 3 sessions [approximately 4 hours contact time])  
and / or  
Training delivered by MIND (current project supporting academic staff who run field trips for students)
3. Refresher training with MIND for MHFA's who have attended (2) in the last 2 years

Our MHFA's also have access to our suite of wellbeing online modules, our employee assistance programme, and podcast, video and Mental health related content.

We have also hosted 'self-care' drop in sessions for our MHFAs where they have an opportunity to network, share anonymised experiences and hear about updated support (internal and external) to add to their 'signposting' resources.

Security personnel are not trained in Mental Health First Aid.

## 3. Security response triage

Information is not held. Security Officers are not trained in medical triage.

#### **4. Response times**

Information is not available as requests for assistance with a first aid incident are not differentiated into categories. There is no differentiation between 'life threatening' or otherwise within our recording system. Therefore information not held.
