Welcome to Logistics and Supply Chain Management at the University of Hull
Hull is one of the centres of the UK’s logistics and supply chain network. It has thriving food and manufacturing industries, while major port complexes link the Humber to global trade routes.

It’s a sector that we’ve developed strong links with, meaning that you’ll have some amazing options when it comes to getting hands-on experience during your course.

You’ll be taught by academics from our internationally-recognised Logistics Institute. So you’ll have access to the very best in logistics and supply chain management thinking.

And you’ll also enjoy our Authentic Business Learning approach which means from day one, you’ll get to test your skills out through live business projects, placements, internships, and more. As well as the different options to study abroad that will give you valuable skills and experiences that employers actively look for. It’s our way of putting you - and your career - at the heart of what we do.

As part of this, we offer a scheme which gives you the tools to succeed in a logistics career, in partnership with NOVUS (part of the Chartered Institute of Logistics and Transport), which works with leading employers – currently including DHL, Sainsbury’s, Morrison’s, Heineken and Nestlé - who in return get work-ready graduates. NOVUS work with universities to provide guest lectures, mentoring, summer placements and a guaranteed (subject to passing NOVUS assessment) year-long placement in your third year.

Combine this with latest-gen IT tools, industry guest speakers and links to partners such as the World Economic Forum, and you have degrees packed with the knowledge and skills to work at the heart of business operations.

In Year 1, you’ll take modules that are common across the whole Business School. That gives you a solid base of business knowledge – which employers often look for, as they want a general understanding of business as well as a specialism. It also means you’ll be able to focus on a specific area or change direction with your degree later in the course, if you want to.

Our links to professional bodies - the Chartered Institute of Logistics and Transport (CILT) and Chartered Institute of Procurement and Supply (CIPS) - mean that graduates are exempt from the academic requirements for CILT membership (there might also be a reduction in the length of experience needed). It also opens your route to becoming a CIPS Member.

All our Business School degrees have international accreditation from AACSB, which is held by fewer than 5% of business programmes worldwide.

§ Entry requirements are different for the foundation year; please contact our Admissions Service for guidance.

On successful completion (pass) of the BA Business Management foundation year (course NN1G), you can either continue with that degree or join Year 1 of any other undergraduate degree in the Business School, subject to meeting any GCSE requirements for that degree.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

For more information, please visit [www.hull.ac.uk/ugsupply](http://www.hull.ac.uk/ugsupply)

We’re always looking to improve our courses. Which means we do review our modules from time to time, to make sure they’re of a high standard and are relevant to you and to your potential future employers.

The information in this guide is correct at the time of going to print, but some of the modules could change before 2021. Please contact our admissions team if you do have any questions or for further information on admissions@hull.ac.uk.

Careers

Our graduates from the logistics and supply chain subject area have found jobs in a variety of organisations, including Rolls-Royce, Bosch and Royal Mail.

Graduate careers

- Supply chain manager
- Procurement executive
- Supply analyst
- Project manager
- International logistics director
- Customer demand planner

Career advice and support

Our careers team will help you learn how to apply for positions, prep for interviews and impress potential employers. We also run networking events on campus, which often lead to internships and job offers.

You’ll benefit from our Centre for Professional Success, too. They’ll support you in sourcing relevant placements, employer projects and e-mentoring. You’ll also get free online access to our alumni community, webinars and online journals.

95% of students in work or further study six months after graduating*

* UK domicile full-time first degree leavers; Destinations of Leavers from Higher Education survey for the academic year 2016/17, published by HESA 2018.
How are degrees taught?
Most of our undergraduate courses are made up of study units called modules.
You’ll be assessed after each module, and the average of all your module assessments for the year is your overall result for that year.

Can I pick and choose modules?
Yes, to an extent. Some modules are compulsory, so you have to take them.
Within that compulsory group are some ‘core’ modules, too. They’re essential to the course (to make sure our degrees qualify for relevant accreditation, for example), so they’ll never change and you have to pass them.

That said, some of our modules are optional – so you can pick what you study to suit your interests and career goals.

How many modules will I take?
Usually, you’ll take six modules a year: three from the start of term to Christmas, and three more between January and the summer. Later in your course, some modules – like larger-scale projects or a dissertation – might count as two modules and run for the full year.

What extra course options do you offer?
We offer three extra options: foundation year, industrial placement and study abroad. Look out for these icons on our course pages – and here’s what they mean.

FY Foundation year
If you don’t quite meet our entry requirements, you can apply to do an extra year of study before starting your course. This foundation year boosts your subject knowledge and helps you gain new academic skills, as well as preparing you to start your full degree.

We look for applicants who can demonstrate an experience of a related subject and an aptitude for academic work – which we establish by asking you to submit an essay and/or come to an interview as part of your application.

Fees for our foundation year are exactly the same as undergraduate years – and you can apply for student finance as with a full degree.

Industrial placement
This means you’ll spend either a full year, one semester or one module working in industry or on a structured work placement. This usually comes between Year 2 and your final year.

Study abroad
Many of our courses include a year abroad in Year 3. If your course isn’t one of them, you can still apply to spend a trimester, semester or a single module overseas.

You can also opt to study abroad over the summer or as an exchange student.
BSc Logistics and Supply Chain Management

Year 1 modules

Compulsory

Operations, Supply Chain and Business Practices
Explore how businesses develop their operations management and supply chain practices to increase their competitiveness.

Personal and Professional Skills for Contemporary Organisations
Learn about organisational behaviour and HRM concepts. Areas of focus include individual difference, personal development, people management and leadership.

Accounting and Finance
You’ll cover topics such as financing decisions; cost behaviour; cost-volume-profit analysis; absorption costing; variance analysis and budgeting.

Business Environments
This module introduces you to the environments – economic, political, social, legal and cultural – that businesses operate in and, in turn, help to shape.

Marketing
This module introduces you to core marketing theories and concepts such as segmentation, targeting and positioning, consumer behaviour and marketing mix.

Learn to manage complex national and international supply chains – and the interconnected stakeholder relationships that support them – while living in a hub of UK logistics. You can choose to develop your skills further by spending a year studying at one of our partner institutions abroad or on a year-long professional placement.
World Economy
You’ll study the changing world economy, developing insights into issues related to international trade, international finance, regional groupings and climate change.

**Year 2 modules**

**Compulsory**

- **Procurement and Supply Management**
  Learn how procurement ensures the supply of materials that businesses need. Concepts include managing business relationships, planning operations and problem solving.

- **Supply Chain Information Management and Big Data**
  Discover the role of information management and big data in supply chains. Learn methods for big data, text mining and social media mining analysis.

- **Ethical and Socially Responsible Procurement**
  Brands are damaged by association with issues like sweatshop conditions, counterfeit goods and pollution. Learn how business ensure that they source goods responsibly.

- **Research Methods**
  Prepare and complete a small action research project. You’ll learn about research methodology, ethical approval, data analysis and formulating research questions.

**Optional**

- **Sustainable Business and Innovation**
  Develop insights into the major trends, challenges and concepts relating to business sustainability and corporate responsibility.

- **Consumer and Business Buyer Behaviour**
  Build a deeper understanding of consumer behaviour and learn how to use this information to develop effective marketing plans and communications.

- **Internet, e-Commerce and Emerging Technologies**
  Discover the emerging digital technologies that are affecting the dynamics of e-commerce. You’ll learn how to develop a website or mobile app without any coding skills.

- **Integrated Marketing Communications and Branding**
  Develop your critical understanding of the role integrated marketing and communications plays in building and sustaining brand identity and equity.

- **Summer School**
  Broaden your horizons by studying at one of our overseas partner institutions for up to three weeks over the summer. This module can count towards your degree.

- **Passport Language**
  Learn a new language or improve your existing language skills and intercultural competence.

**Final-year modules**

**Compulsory**

- **Supply Chain Network Design**
  Learn the concepts and principles of supply chain network design, covering issues such as warehouse operations, materials and capacity management, and multimodal logistics.

- **Global Logistics and Port Management**
  On this module, you’ll learn about the structure of global supply chains, international procurement and transport, supply chain security, and the complexity of decision making.

- **Supply Chain Sustainability and the Environment**
  Explore sustainability practices in various manufacturing and service organisations, covering issues like responsible procurement and fair trade, humanitarian logistics and disaster relief.

- **Supply Chain Consultancy Project**
  This module introduces you to the theory and practice of supply chain consultancy projects, enabling you to apply your knowledge to industrial practice.

  You’ll then choose one from the following three modules:

  **Dissertation**
  Make your original contribution to research by designing, carrying out and writing up a dissertation worth 40 credits (across two modules) on a topic of your choice, supported by your supervisor.

  **Research Project**
  Make your original contribution to research by designing, carrying out and writing up a research project worth 20 credits (for one module) on a topic of your choice, supported by your supervisor.

  **SMART: Problem-Solving for Complex Systems**
  Learn to evaluate complex problems - taking into account multiple dimensions and stakeholder perspectives - to anticipate consequences and make appropriate decisions.

**Optional**

- **Organisation in the Digital Economy**
  The internet and emerging digital tech present business with all kinds of opportunities and challenges. Here you can explore the new management mindsets needed to address them.

- **Business Project Management**
  This module addresses project management, covering a range of concepts, tools, techniques and approaches. You’ll explore factors affecting project success and failure.

- **Managing Your Money – Personal Financial Planning**
  Prepare for the financial challenges and opportunities of life after uni. You’ll cover topics including tax, student loans, credit, debt, pensions, insurance, savings and investments.
Summer School
Broaden your horizons by studying at one of our overseas partner institutions for up to three weeks over the summer. This module can count towards your degree.

Passport Language
Learn a new language or improve your existing language skills and intercultural competence.

On these courses, you’ll learn how to manage global and international supply chains within a business. You’ll discover how management techniques and supply chains keep business moving, with the help of facilities like our Technology Innovation Hub.

Compulsory
Operations, Supply Chain and Business Practices
Explore how businesses develop their operations management and supply chain practices to increase their competitiveness.

Accounting and Finance
You’ll cover topics such as financing decisions; cost behaviour; cost-volume-profit analysis; absorption costing; variance analysis and budgeting.

Marketing
This module introduces you to core marketing theories and concepts such as segmentation, targeting and positioning, consumer behaviour and marketing mix.

Personal and Professional Skills for Contemporary Organisations
Learn about organisational behaviour and HRM concepts. Areas of focus include individual difference, personal development, people management and leadership.

Business Environments
This module introduces you to the environments - economic, political, social, legal and cultural - that businesses operate in and, in turn, help to shape.
"It’s been a great experience, this placement year so far. I’ve learnt so much. And I’ve had a lot of responsibility, which has actually surprised me.

“I’ve really noticed a change in myself. I’m a lot more confident and I’ve really developed as a person.”

**Sam Fenton**
BSc Supply Chain Management, on placement at Siemens Gamesa

---

**World Economy**
You’ll study the changing world economy, developing insights into issues related to international trade, international finance, regional groupings and climate change.

**Year 2 modules**

**Compulsory**

**Responsible Business in Society**
On this module, you’ll explore concepts like responsible business, corporate social responsibility, business ethics and sustainable development.

**Organisational Management**
Explore approaches to organisational management and learn to integrate theory and practice. You’ll consider various practices and the assumptions behind them.

**Procurement and Supply Management**
Learn how procurement ensures the supply of materials that businesses need. Concepts include managing business relationships, planning operations and problem solving.

**Supply Chain Information Management and Big Data**
Discover the role of information management and big data in supply chains. Learn methods for big data, text mining and social media mining analysis.

**Optional**

**European Business**
This module enhances your understanding of the EU, both in terms of internal policy and its commercial relations with the rest of the world, including the US and emerging nations.

**Ethical and Socially Responsible Procurement**
Brands are damaged by association with issues like sweatshop conditions, counterfeit goods and pollution. Learn how business ensure that they source goods responsibly.

**Internet, e-Commerce and Emerging Technologies**
Discover the emerging digital technologies that are affecting the dynamics of e-commerce. You’ll learn how to develop a website or mobile app without any coding skills.

**The Organisational and Environmental Context of HRM**
Develop an understanding of how organisational and environmental context informs human resource management in terms of its design, organisation, leadership, ethics and practice.

**Learning and Development**
This module focuses on the practice and theory of learning and development – illustrating how to evaluate both its role and its influence on organisational success.

**Understanding Entrepreneurship**
You will interview real-life entrepreneurs and develop an understanding of the factors which contribute to successful entrepreneurship, how entrepreneurship differs around the world, and how governments encourage it.
Engaging with Entrepreneurial Organisations
Work with a local SME or innovative company to solve a business problem. This could include introducing new products into markets, developing a growth plan, or undertaking a market feasibility for a new product or service.

Sustainable Business and Innovation
Develop insights into the major trends, challenges and concepts relating to business sustainability and corporate responsibility.

Consumer and Business Buyer Behaviour
Build a deeper understanding of consumer behaviour and learn how to use this information to develop effective marketing plans and communications.

Integrated Marketing Communications and Branding
Develop your critical understanding of the role integrated marketing and communications plays in building and sustaining brand identity and equity.

Research Methods
Prepare and complete a small action research project. You’ll learn about research methodology, ethical approval, data analysis and formulating research questions.

Summer School
Broaden your horizons by studying at one of our overseas partner institutions for up to three weeks over the summer. This module can count towards your degree.

Passport Language
Learn a new language or improve your existing language skills and intercultural competence.

Final-year modules

Compulsory

Business Strategies
Consider business strategy and strategic decisions in diverse contexts. You’ll learn to use strategic analysis to make choices that create stakeholder value and strategic advantage.

International Business
Focus on the core concepts and practical applications of cross-border business. You’ll explore the controversies and complexities surrounding international business issues.

Global Logistics and Port Management
On this module, you’ll learn about the structure of global supply chains, international procurement and transport, supply chain security, and the complexity of decision making.

Supply Chain Sustainability and the Environment
Explore sustainability practices in various manufacturing and service organisations, covering issues like responsible procurement and fair trade, humanitarian logistics and disaster relief.

You’ll then choose one from the following three modules:

Dissertation
Make your original contribution to research by designing, carrying out and writing up a research project worth 40 credits (across two modules) on a topic of your choice, supported by your supervisor.

Research Project
Make your original contribution to research by designing, carrying out and writing up a research project worth 20 credits (for one module) on a topic of your choice, supported by your supervisor.

SMART: Problem-Solving for Complex Systems
Learn to evaluate complex problems - taking into account multiple dimensions and stakeholder perspectives - to anticipate consequences and make appropriate decisions.

Optional

Employee Relations and Engagement
Explore the strategies that employers use to manage their employees. You’ll study how potential commonalities and conflicts are understood and managed in the workplace.

Organisation in the Digital Economy
The internet and emerging digital tech present business with all kinds of opportunities and challenges. Here you can explore the new management mindsets needed to address them.

Services Marketing
This module is concerned with customer experience and ensuring that an organisation is service-centric, so it can achieve higher outcomes such as customer satisfaction and loyalty.

Business Project Management
This module addresses project management, covering a range of concepts, tools, techniques and approaches. You’ll explore factors affecting project success and failure.

Managing your Money - Personal Financial Planning
Prepare for the financial challenges and opportunities of life after uni. You’ll cover topics including tax, student loans, credit, debt, pensions, insurance, savings and investments.

Comparative International Human Resource Management
Consider complex workplace dynamics and cross-cultural and multinational factors. You’ll learn the strategies and practice of human resource management in international contexts.

Passport Language
Learn a new language or improve your existing language skills and intercultural competence.
Be part of something extraordinary

Here at Hull, we know extraordinary is in you. And we’re here to help you find it. This is why we’ve partnered with Team GB. Our united belief is that anyone, with the right opportunities ahead and a dedicated team behind, can achieve extraordinary things.

The partnership isn’t the only thing we’ve got going for us either. We also offer you guaranteed accommodation, with more than 2,300 rooms on campus. Our students go on to do amazing things too, with 95.9% of our graduates in work or further study with six months.

We’re in the top 50 universities for research power**

Which basically means we’re helping to change the world through the work our people are doing. And you could be part of it. From tackling marine pollution to breaking the chain of modern-day slavery, our research is not only enriching the lives of people across the world, it enriches your university experience. So come and get involved.

Whether you’re into bands or board games, food or film, history or horror, sci-fi or skateboarding, this is a place to do more of what you love – there’s something for everyone here in Hull. It’s your home away from home. And your chance to discover who you really are.

Choose extraordinary. Choose Hull.

---

^ We guarantee you a room in University-owned or partnered accommodation if you apply by 1 October.
† Destinations of Leavers from Higher Education for the academic year 2016/17, published by HESA June 2018.
** Times Higher Education, based on the most recent Research Excellence Framework 2014.
This. Is. Hull.

A place where we stand up to kings, do deals with the world and take a wrecking ball to the slave trade. A place where culture stands out and the phone boxes are a different colour. A place where we're free thinking, independent and proud of it.

Learn more about Hull at hull.ac.uk/abouthull
You’ll feel right at home in Hull

We have something for everyone here. Whatever you choose, you’ll find a place to live that works best for you. And if you apply by 1 October, we guarantee you a University room.*

From 41, 43 and 51-week contracts, so you don’t pay for more than you need

2,300+ on-campus rooms

Up to 150mbps FREE WiFi**
Connect up to 7 devices to the WiFi at once

24/7 security on campus

For further information, please contact the Accommodation Hub
01482 466042

Take a virtual tour of our rooms
Go to hull.ac.uk/accommodation to find out more and take a 360° tour of where you’ll be living.

* If you’re a new, full-time, unaccompanied student, and you apply for accommodation by 1 October, we guarantee you a room in accommodation that’s owned or in partnership with the University.

** Westfield Court and Taylor Court only.
Your guide to fees and funding

So ... time to talk about money. How much does university cost? How are you going to pay for it?

How much does it cost to study an undergraduate degree?

<table>
<thead>
<tr>
<th>Are you a UK student?</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>£9,250 per year* on a full-time degree</td>
<td>£14,800 (non-science courses) or £17,550 (science courses) per year for EU and international students</td>
<td></td>
</tr>
</tbody>
</table>

You'll pay lower fees while you're on a year abroad or an industrial placement year.

What loans are available?

There are two types of loan available to students from England:

**Maintenance loan**
- Helps with the cost of living
- Partially means tested
- Paid straight into your bank account at the start of each term
- You won't have to pay any of it back until you're earning more than £27,295 a year
- After 30 years, any remaining debt is written off - regardless of what you still owe

**Tuition fee loan** - Currently £9,250*
- Covers the full cost of your course fees
- Paid straight to the University
- You don't start paying any of it back until you're earning more than £27,295 a year
- After 30 years, any remaining debt is written off - regardless of what you still owe

* Subject to approval. This fee is subject to an increase in line with inflation. Maximum tuition fees are set by the government.

How much can I borrow?

What you can borrow for your maintenance loan depends on your family's income and where you'll be living while you're at uni.

Is your family's annual household income £25,000 or less?

- Yes
  - When you come to uni, where will you be living?
    - At home
      - You'll be able to borrow £7,987
    - Away from home
      - You'll be able to borrow £9,488

- No, it's more than that
  - Household income | Living away from home | Living at home |
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>£25,000</td>
<td>£9,488</td>
<td>£7,987</td>

<td>£8,130</td>
<td>£6,642</td>
</tr>
<tr>
<td>£40,000</td>
<td>£7,450</td>
<td>£5,969</td>
</tr>
<tr>
<td>£45,000</td>
<td>£6,771</td>
<td>£5,296</td>
</tr>
<tr>
<td>£50,000</td>
<td>£6,092</td>
<td>£4,623</td>
</tr>
<tr>
<td>£55,000</td>
<td>£5,412</td>
<td>£3,950</td>
</tr>
<tr>
<td>£60,000</td>
<td>£4,733</td>
<td>£3,516</td>
</tr>
<tr>
<td>£62,286 or above</td>
<td>£4,422</td>
<td>£3,516</td>
</tr>
</tbody>
</table>

2021/22 Maintenance Loan figures

Is your annual salary above £27,295 a year?

- Yes
  - You don’t have to make any repayments
- No, it’s less than that

And how much will I be paying back after I graduate?

Just to recap, you don’t have to pay back anything until your salary goes above £27,295 a year. When that happens, the amount you’re earning determines what your loan repayment will be.

<table>
<thead>

How to apply to Hull

When you apply for Hull, you’ll have a team ready to answer your questions every step of the way. From starting your application to the day you win a place to come here.

UCAS

For most of our full-time undergraduate courses, you need to register and apply through the Universities and Colleges Admissions Service (UCAS).

You can find the entry requirements on your course page at hull.ac.uk. But as a general guide, we’re happy to consider applications from candidates with predicted grades totalling 112 UCAS points or above.

To find out more, go to hull.ac.uk/admissions

To register and apply, go toucas.com/students

International student? See hull.ac.uk/international for more information on how to apply.

Our UCAS institution codes

H72: All Hull courses except Medicine
H75: Medicine (Hull York Medical School)

Dates for your diary

1 September: UCAS applications open
15 October: Medicine UCAS applications deadline
15 January: UCAS applications deadline for all other courses to guarantee equal consideration
Late February: UCAS Extra opens
30 June: Main UCAS application scheme closes
4 July: UCAS Extra closes
